DETAILED ACTION

Allowable Subject Matter

Claims 1-6, 8, 10, 12-17, and 43-50 are allowed over the prior art of record as amended in the 02/15/2010 reply.

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed device of a catheter that detects contact between a distal end of the catheter and a target tissue site via a sensing electrode at the distal end of the catheter. The catheter is able to deliver a fluid containing macromolecules to the tissue site upon detecting contact between the tissue site and the catheter. Concurrently or soon after delivery of the fluid, an electrical stimulus is applied to the tissue site. The electrical stimulus can be applied by the catheter or directly from a power supply, such as an implanted pulse generator. The electrical stimulus causes membranes of cells within the tissue site to destabilize, in turn, forming pores through which the macromolecules migrate into the cells of the tissue site.

The closest prior art of record is Vachon et al. (USPN5,833,715) and Epstein et al. (USPN6,835,193), however these references do not disclose the device as claimed or described above.

Regarding claims 1, 43, 44 and 45, the closest prior art of record fails to teach among all the limitations or render obvious the specifics of the single point electrode on the catheter body and probe interaction with the internal seal assembly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
